Task 1 Kanban

To Do List | 1

Task 1 - User Story Mapping (20m)

To do | Sep 06 — Sep 30

In progress | 5

Identify our target users, mission and values and benefits of this product

Construct the Google Form

Constructing the Activities in relation to Time and Tasks in relation to complexity

Constructing a User Story Map using Miro

Create our Product Backlog

Done | 2

Complete Briefing 6/9/2022

Sep 06

Creating a Kanban using Miro for Continuous Assessment

Task 2 Kanban

To Do List | 1

Task 2 - Setting up a GitHub Repository (10m)

📅 Sep 06 — Nov 18

In progress | 2

Upload the rest of the Tasks' files, including Task 1, 3, 4 and 5

Push this Kanban pdf to the repository 's master branch

Done | 5

Create and register a GitHub account

Make our first local repository and publishing it to GitHub

Create branches

Commit our first change (creating a local file and merging it to master)

Lab Session 2 (6th September)

Task 3 Kanban

To Do List | 1

Task 3 - Creating a Class Diagram and Design Pattern Selection (30m)

📅 Nov 04

In progress | 1

Work in Progress

Done | 0

Task 4 Kanban

To Do List | 1

Task 4 - Creating a Prototype User Interface and Usability Testing (20m)

📅 Nov 04

Software Design Continuous Assessment College Buddy System for Students

Task 1 – User Story Mapping

Identify the users, in our case INTI students. We will be creating a Google Form to obtain suggestions and feedback to complete our College Buddy System.
The form should include quality questions that are both close-ended and open-ended to build our product backlog on.

Interview Outcomes

Ask questions related to why a user might use a College Buddy system. For example:
a) Firstly, what type of platform would you find most suitable for something is used to quickly access information throughout campus and so on
b) What issues do you think you are facing when trying to get a college buddy, even if you already have one or more.

Identify the user stories to make our user activities

Next Steps

Construct our Product Backlog

Task 2 – Setting up a GitHub Repository

Setting up our GitHub environment

Type something

Task 3 – Creating a Class diagram and design pattern selection

Task 4 – Creating a Prototype User Interface and Usability Testing

Type something

Type something

Task 5 – Discuss the ethical issue related to the software

Overview of the Project

To Do List | 6

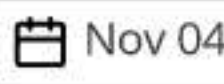

Task 1 - User Story Mapping (20m)
◌ To do 📅 Sep 06 — Sep 30

Task 2 - Setting up a GitHub Repository (10m)
📅 Sep 06 — Nov 18

Task 3 - Creating a Class Diagram and Design Pattern Selection (30m)
📅 Nov 04

Task 4 - Creating a Prototype User Interface and Usability Testing (20m)
📅 Nov 04

Task 5 - Discuss the Ethical Issues related to the software (20m)
📅 Nov 04

Submission
📅 Nov 18

In progress | 2

Task 1 - Starting our brainstorming for Google Form questions

Task 2 - Making our first ever repository and using git
